

Time Tracking

Fewer Errors

Intelligent clock technology helps eliminate duplicate or missed punches and errors computing total hours and pay.

Clock Lockout

Limit early clock in, scheduling warns when overtime approaches, managers easily view time cards in real time.

Less Unplanned Overtime

Eliminate unplanned overtime and compare budgeted hours to actual worked time.

Faster Payroll Processing

Fewer errors, instant access for time card review and export to payroll reduces time spent processing payroll.

Flexible Configuration

Customized pay rules, overtime calculations, compliance requirements and accrual application. Wide range of physical and online clock options.

Subscription Service

One service provides you with everything needed for interactive and automated workforce management—geofencing, unified login and filtered clock prompts.

TimeWorksPlus

TimeWorksPlus delivers the latest in cloud-based punch and time card services supporting intelligent clock features and a wide range of clocks. Track and manage punches, time cards, time-off requests and accruals. Seamlessly integrates with payroll services.

TimeWorksPlus Features

- ✓ **Timekeeping** - Captures time data from clocks, calculate multiple rates, accruals, and keeps audit trail.
- ✓ **Scheduling** - Easy setup for any shift, coverage view, templates, early warning and clock-lockout.
- ✓ **Overtime Management** - Auto-apply overtime or proactively alert as thresholds approach. Flexible calculations and application.
- ✓ **Payroll Integration** - Easy time card review and approval. Connects time data to payroll processing for fewer errors and faster completion.
